

Hi!

My partner and I are planning
having a baby.

I'm roughly 20 kgs overweight. I
wonder if I loose some weight,
could that help our chances to
have a baby?

Dear PCHC-professional!

I'm 38 years old and my husband is about same age. I still look and feel really young. We both are in excellent health.

How long can we wait until having babies?

Please can you help me?

I've always been sort of skinny. Now I've been training and I haven't have my periods for eight months now. Could this affect my fertility permanently?

I have solved my aging issue!
Me and my partner have my eggs
frozen in fertility clinic. Now we can
postpone having children as long as we
want!
Right?!

If man is 39 years old, but virile and willing. How long is he capable of conceiving his own children?
